Faster, smarter patient recruitment

Gain true visibility and command of your patient recruitment outcomes with OneView

OneView is the cloud-based, real-time recruitment intelligence platform that transforms fragmented referral data into a unified, actionable, real-time view of the patient journey—delivering patient-level transparency from first outreach through enrollment. Teams gain visibility, efficiency, control, and agility to optimize strategy as the study progresses.

Centralized referral management improves the patient experience and reduces friction

Real-time performance dashboards help refine strategy, mitigate risk and maximize ROI

Dynamic site and patient intelligence supports real-time decisions and mid-study adjustments

Full data transparency across all referral sources, studies, and sites enhances speed and accountability

Unlike platforms that rely on aggregated or delayed data, OneView delivers patient-level, real-time transparency—from first outreach through enrollment—so your team can monitor performance, optimize in-flight strategies, and maximize ROI as your study unfolds.

ONEVIEW WITH INSTANT ACCESS MEDICAL RECORDS

This optional integration gives sites immediate access to comprehensive longitudinal patient records, allowing for rapid patient qualification and enrollment decisions.

- **Rapid clinical decision-making:** Instant Electronic Medical Record (EMR) access improves screening spend

- **Precision matching:** Filter by patient data diagnosis date, ICD-10 codes, prior therapies and more

- **Targeted outreach:** Visual patient histories guide engagement priorities

- **Real-time triage:** Continuously adjust care plans based on up-to-date patient data
